SETTLEMENT OF FIXED ELECTRICITY PRICE FOR THE ENTIRE PORT OF GRENAA

Grenaa Port is transitioning to a new billing and metering system, which means that a single fixed electricity price will be applied across the entire port area going forward. This uniform price structure aims to ensure transparency and simpler administration for the port's customers.

The fixed electricity price is **1.48 DKK per kWh**. The price may be adjusted quarterly, but adjustments will only occur if necessary and will be announced well in advance.

PORT OF GRENAA FIXED ELECTRICITY PRICE			
System tariff	DKK	0,07	per kWh
