

SUPPORT YOUR BUSINESS

We ensure development and
optimisation of your bulk operations

Port of Grenaa
Support your business

DENMARK'S MOST CENTRAL DEEP WATER PORT

We strive to find the best solutions in close cooperation with you

Our years of experience with flexible, efficient bulk cargo handling ensure that we can always find the right solution. For example, we have a range of different cranes, which means that we can quickly find the most efficient way to unload and load for any given job. Bulk cargo can be safely stored in open air areas or under cover in our warehouses.

We simply offer the best facilities for handling a very wide range of cargo. Our unique location, flexibility for gang size, efficient warehouse layout, crane capacity and customised services ensure high quality solutions.

The ideal location

The Port of Grenaa features vast paved and unpaved storage areas close to the quay, a water depth of up to 11 metres and plenty of room for expansion – to the benefit of our bulk customers.

Handling raw materials can cause environmental problems, such as dust or odours. Storage areas are at a comfortable distance from residential areas, and our experience with bulk cargo means we can provide the best conditions possible for our customers. That's why leading raw materials importers and exporters already use the Port of Grenaa for shipping, transporting and storing bulk cargo.

Efficient distribution

Grenaa provides direct access to shipping lanes through the Kattegat. Combined with easy access to route 15 towards Aarhus, route 16 towards Randers and the E45 motorway, our customers using storage facilities at the Port of Grenaa can set up an extremely efficient distribution network.

Efficiency and central location make us the perfect choice for transit to the Baltic countries – and the entire Baltic region.

Warehouses

- Located close to the quay, ensuring quick, easy, loading and unloading
- Solid concrete floors or concrete paving with lighting in every warehouse
- Automatic, lockable electric doors
- No pillars inside, maximum use of available space and accessibility
- Several insulated warehouses can be heated
- Plenty of headroom - easy truck access and tipping inside
- 22 warehouses, sizes 750-2,100 sqm. In total 28,000 sqm
